About Me

I'm Vincent Ace Fronteras, a BSIT student at St. Dominic College of Asia with a strong passion for software development, web technologies, and IT systems. I enjoy building responsive designs and user-friendly web and mobile applications using technologies like Next.js, and Node.js while continuously improving my skills and knowledge. I am also comfortable in teamwork, adapting to pressure, and learning new technologies through hands-on experience and certifications. I aim to apply my knowledge to real-world projects, strengthen my technical abilities, and grow professionally in the IT industry.

Education

Bachelor of Science in Information Technology St. Dominic College of Asia — Emilio Aguinaldo Hwy, Bacoor, Philippines 2023 – Present

- Relevant coursework: Programming, Web Development, Database Management, Software Development

STEM (Senior High School) Unida Christian Colleges — 231 Unida Street, Anabu I-F, Imus, 4103 Cavite, Philippines 2021 – 2023

Projects & Experience

Rx Box — AI-Driven Smart Pillbox | Next.js · Node.js · TypeScript

- Designed a user-friendly UI for the Rx Box web application using Next.js, Tailwind CSS, focusing on clear navigation and an intuitive user experience.
- Conducted application testing to check functionality, usability, and overall user experience.
- Evaluated the interface from a user's perspective to identify areas for improvement and make the application easier to use.

SDCanteen — Mobile App | XML · Java · Firebase

- Designed and developed the frontend UI of the SDCanteen mobile application using Java and XML in Android Studio.
- Focused on creating a clean, user-friendly interface that makes canteen ordering and supply tracking easier to use.
- Tested the application’s interface and functionality to identify issues and improve usability.

AI-Enabled Smart Trash Bin | Dart · Firebase

- Designed user-friendly and responsive UI layouts to improve the overall user experience.
- Conducted system testing to check functionality, usability, and identify issues for improvement.
- Focused on creating a clean, intuitive interface that makes the system easier to navigate and use.
